

Jubril Bucknor

I am a meticulous and dedicated Software Engineer with an unwavering commitment to delivering top-notch products on time. With a keen attention to detail, I am continuously motivated to master emerging technologies, aiming for nothing less than excellence. Alongside my technical proficiency, I stand out as a collaborative team player, adept at both advanced coding and clear communication. Beyond work, I harness my analytical skills to dissect football matches and broaden my horizons by learning British Sign Language.

EXPERIENCE

Decagon, Lagos — Associate Software Engineer

JUNE 2023 - PRESENT

- Contributed as a team member to developing an innovative e-commerce project, leveraging cutting-edge technologies.
- I have delivered projects using modern technologies, including React.js for dynamic front end, Spring Boot for resilient back end, Restful API for endpoints, and core Java for foundational programming.
- Proficiently managed Database Management Systems, encompassing SQL databases such as Postgres and MySQL, as well as NoSQL databases like MongoDB.
- Proficiently engaged with Agile Methodologies to facilitate efficient project management, fostering collaborative workflows and iterative development approaches.

Freelance work — Freelance software Developer

APRIL 2022 - MAY 2023

- Strengthened programming fundamentals through completion of the Harvard CS50 2021 edX course, enhancing my knowledge of key concepts in computer science.
- Developed multiple projects using HTML, CSS, and vanilla JavaScript, showcasing my proficiency in front-end web development. Several projects were successfully deployed on Netlify for online accessibility.
- Translated core CSS to Bootstrap, elevating responsiveness and design consistency across web projects.

TECHNOLOGIES

- MySQL
- PostgreSQL
- SwaggerUI
- Postman
- Spring Framework
- MongoDB
- Version Control with Git and GitHub
- Font Awesome
- Continuous Integration and Continuous Delivery
- Jira

SKILLS

- Active Listener
- Strong Organisational skills
- Adaptability
- Collaborative Team player
- Exceptional Communication skills
- Self-Management
- Empathy
- Conflict Resolution
- Test-Driven Development

PROJECTS

devTicket

Utilized technologies including Spring Boot, Hibernate, React, and PostgreSQL to create a personalized Todo list, enhancing time management and task focus.
